

Blue Gold Macaw

The Blue and Gold Macaw can get quite large, one of the largest parrots in the world, and can be as long as 34 inches and weigh up to 3 pounds! The Blue and Gold Macaw can live as long as 60 years which is one of the longest lifespans of any parrot.

The Blue and Gold Macaw is very intelligent and can imitate human speech, which makes them popular among many people. This coupled with their long lifespan make them a lifelong companions.

To properly raise a Blue & Gold Macaw requires knowledge and care which is much more extensive than most other pets. They require an owner willing to spend a great deal of time with them and bond strongly to one person.
